

COMMON CATALOGUE OF VARIETIES OF AGRICULTURAL PLANT SPECIES

2020 CONSOLIDATED VERSION

LEGEND

1. The common catalogue of varieties of agricultural plant species is published in accordance with the provisions of Article 17 of Council Directive 2002/53/EC of 13 June 2002 on the common catalogue of varieties of agricultural plant species¹.

In accordance with the entry into force of the Agreement on the European Economic Area (EEA), the common catalogue comprises also EFTA countries' varieties fulfilling the requirements of the Agreement².

In accordance with the Agreement between the European Community and the Swiss Confederation on trade in agricultural products³, the common catalogue also comprises the Swiss varieties fulfilling the requirements of the Agreement.

This catalogue lists all the varieties, the seeds of which, pursuant to Article 16 of the abovementioned Directive, are not subject, in the EEA, to marketing restrictions relating to variety, except in the cases provided for in Article 16(2) and Article 18 of the aforementioned Directive.

Varieties notified in the framework of Commission Directive 2008/62/EC of 20 June 2008 providing for certain derogations for acceptance of agricultural landraces and varieties which are naturally adapted to the local and regional conditions and threatened by genetic erosion and for marketing of seed and seed potatoes of those landraces and varieties⁴, are referred to as 'conservation varieties'.

2. The common catalogue of varieties of agricultural plant species was published for the first time on 21 July 1975⁵. This 2020 consolidated version lists the varieties which, from 1 December 2020⁶ at the latest, are no longer subject, on the territory of the whole EEA, to marketing restrictions relating to variety, except in the cases provided for in the abovementioned Directive.
3. The catalogue is subdivided according to the species covered by the Directive. Within each species, or where appropriate subspecies, it lists the varieties in alphabetical order of their accepted varietal names. These are:
 - (a) the names under which a variety is officially admitted in the Member States or EFTA country; pursuant to Article 9(2) of Directive 2002/53/EC, new varieties

¹ OJ L 193, 20.7.2002, p. 1.

² Agreement on the European Economic Area, 1992.

³ OJ L 114, 30.4.2002, p. 132. The amendment introducing the Joint catalogue for varieties of agricultural plant species was published in OJ L 136, 30.5.2009, p. 2.

⁴ OJ L 162, 21.6.2008, p. 13.

⁵ OJ C 164, 21.7.1975, p. 1.

⁶ Supplement 2020/10 (OJ C 416, 1.12.2020).

may be admitted in a Member State or EFTA country only under one name. The same variety may be admitted in another Member State or EFTA country under a different name only if justified;

- (b) the other names under which seed of the variety is still being marketed (old varieties).

For simplicity, when seeds of one variety are marketed under several names one conventional name has been chosen. As a general rule this name is the official name given to the variety in the first known country of admission. All details of the variety are placed under this name.

For the other varietal names reference is simply made to the relevant conventional name.

4. The catalogue comprises four columns:
- column 1: 'Variety',
 - column 2: 'EU country of admission',
 - column 3: 'EFTA country of admission',
 - column 4: 'Observations'.

Column 1 lists all the varietal names in alphabetical order.

For conventional names the information relating to the varieties is given over the four columns in the manner explained in paragraph 5.

For other names reference is made in column 4 to the conventional name as shown in the following example:

BETA VULGARIS L.

1	2	3	4
Matura			= Matador

5. In the case of conventional names the four columns contain the following information referring to the variety:

5.1. Column 1

Immediately below the conventional name, the other names of the variety by which it has been officially admitted into Member States or EFTA country are repeated in alphabetical order preceded by a dash, only one per country of admission being given.

For names of varieties not covered see 5.3.

5.2. Columns 2 and 3

- An asterisk appears before the abbreviation of each Member State or EFTA country having officially admitted a variety.

- Where admission was exclusively based on the criteria of distinctness, stability and uniformity and provided that the variety concerned was admitted in another Member State or EFTA country with value for cultivation and use, the asterisk appears in brackets.
- In most cases the country abbreviation is followed by a number. This number indicates the person responsible for the maintenance of the variety in the country of admission. The names corresponding to these numbers are contained in the Annex entitled 'List of names of the person or persons responsible for the maintenance of varieties and of the authorities holding the list of names of such persons'.
- Where an 'x' replaces this number it means that there are several persons considered as responsible for maintenance by the country of admission. Their names may be obtained from the authority indicated in the list for the Member State of EFTA country concerned.
- Where the number or the 'x' is underlined, it means that the persons concerned are also responsible for the maintenance of the variety for other countries of admission for which an asterisk appears without a number or an 'x'.
- The aforementioned notes are given on the line corresponding to the name under which the variety has been officially admitted into the Member State or EFTA country concerned (see 5.1).

5.3. Column 4

Information of the following kind is given in this column:

- ploidy of the variety is indicated by the letters 'D' (diploid), 'P' (polyploid or triploid) or 'T' (tetraploid),
- the ploidy of both seed-bearing and pollen-shedding components of seed-producing crops of sugar and fodder beet is established as follows:
 1. $2n$ Diploid without male sterility
 2. $2n \times 2n$ Male sterile diploid with a male diploid
 3. $4n \times 2n$ Male sterile tetraploid with a male diploid
 4. $2n \times 4n$ Male sterile diploid with a male tetraploid
 5. $2n \times (2n + 4n)$ Male sterile diploid with a male anisoploid
 6. $4n$ Tetraploid without male sterility
 7. $2n + 4n$ Diploid and tetraploid without male sterility,
- the monogerm and multigerm are indicated respectively by the letters 'm' and 'M',
- hybrid varieties are indicated by the letter 'H',

- names not covered by point 5.1 are given in alphabetical order followed by the abbreviation for the Member State or EFTA country in which the name is used,
- a name no longer permitted under the provisions of point 3 or which has been corrected, but was listed in the previous edition of this catalogue, is indicated, for information only, preceded by the abbreviation ‘ant.’,
- authorisations to prohibit the marketing of seed of a given variety (see Article 16(2) or Article 18 of the Directive) are indicated by an ‘ex’ followed by the abbreviation of the Member State or EFTA country and the date of the authorisation; if this authorisation is limitative, the letters ‘lim.’ appear,
- where a variety is deleted from the catalogue and a period for certification and marketing of seed is allowed under Article 15(2) of Directive 2002/53/EC, the duration of that period shall be indicated by the date of expiry preceded by the letter ‘f’.

Other information is given in an ad hoc list of notes:

- (1) Not intended for the production of fodder plants.
- (2) *Ssp. tenuifolia*.
- (3) *Ssp. duriuscula*.
- (5) *Ssp. vulgaris*.
- (6) *Vallesiaca*.
- (7) 42 *chromosomata*.
- (8) 56 *chromosomata*.
- (11) In Ireland and the United Kingdom accepted as *Lolium multiflorum* Lam.
- (12) Apomictic uniclinal.
- (13) Bitter.
- (14) Variety registered in other Member States in the catalogue of varieties of vegetable species.
- (15) *Forma hibernalis*.
- (16) *Forma aestiva*.
- (17) For fodder purposes.
- (18) Linseed.
- (19) Flax.
- (21) Male sterile hybrid variety intended for a varietal association.
- (24) *Multiline*.
- (25) In principle communicated by the first country of admission. The values have, in principle, been calculated according to the FAO classification system. Where indicated by an asterisk(*), they have been calculated according to a national classification system.
- (26) S = Simple hybrid. D = Double hybrid. T = Triple-cross hybrid.

- (29) Not clearly classifiable as a linseed or flax variety in the absence of established definitions for these common names and not uniformly classified by Member States.
- (30) Variety producing seed with a maximum glucosinolate content of 25 $\mu\text{mol/g}$ and an erucic acid content of not more than 2 % of the total fatty acid content (00 variety).
- (31) Pollinator.
- (32) Variety denomination approved in the form of a code.
- (33) Component.
- (34) Genetically modified variety. Marketing of seed permitted under the conditions laid down in Commission Decision 98/294/EC.
- (35) Resistant to *Orobanche*.
- (36) Genetically modified variety. Marketing of seed permitted under the conditions laid down in Commission Decision 2010/135/EU.
- (37) Genetically modified variety. Marketing of seed permitted under the conditions laid down in Commission Decision 98/293/EC.
- (38) Variety producing seed with a maximum glucosinolate content of 18 $\mu\text{mol/g}$ and an erucic acid content of not more than 2 % of the total fatty acid content.
- (39) Variety notified by some Member States as producing seed with a glucosinolate content between 18 and 25 $\mu\text{mol/g}$ and by other Member States as producing seed with a maximum glucosinolate content of 18 $\mu\text{mol/g}$ and an erucic acid content of not more than 2 % of the total fatty acid content.
