Conditions of trade relating to EHDV for bovine, caprine, ovine, camelid, cervid and other ungulate animals destined for France from an area not free from EHDV from 6th of November 2026

In accordance with Articles 13, 17, 24, 27 and 30 of Commission Delegated Regulation (EU) 2020/688 of 17 December 2019, the competent authority of the Member State of origin may authorise the movement of animals which do not fulfil at least the requirements laid down in points 1 and 2 of Part I of Annex IX to Delegated Regulation (EU) 2020/688, to another Member State or an area thereof, if the Member State of destination has informed the Commission and the other Member States that such movements are authorised.

The following derogatory conditions apply exclusively to animals of EHD susceptible-species originating from an area where EHDV serotype 8 (EHDV-8) is circulating. For animals originating from areas where other EHDV serotypes are circulating, the general requirements laid down in Commission Delegated Regulation (EU) 2020/688 of 17 December 2019 shall apply.

I. Animals over 90 days of age

Conditions applying to animals of susceptible species being moved to an area where the EHDV-8 virus is circulating : No additional conditions apply for EHDV-8.

Conditions applying to animals of susceptible species being moved to an area where the EHDV-8 virus is not circulating:

- The animals must be vaccinated against EHDV-8. If the vaccine specifications do not specify an immunity period, the animals must have been vaccinated no more than 12 months prior to departure.
- The movements will take place at least 30 days after the injection of the primary vaccination course (if the vaccine used requires a single injection); or 10 days (if the vaccine used requires 2 injections).

OR

- Are protected against vector attacks by insecticides or repellents for at least 14 days preceding the date of movement;

AND

- Subjected during this period to a PCR with a negative result, carried out on blood samples taken at least 14 days after the date of onset of protection against vector attacks.

II. Animals under 90 days of age

Conditions applying to animals of susceptible species being moved to an area where the EHDV-8 virus is circulating : No conditions apply for EHDV-8.

Conditions applying to animals of susceptible species being moved to an area where the EHDV-8 virus is not circulating:

The animals:

- Must come from a mother vaccinated against EHDV-8 within the 12 months preceding the date of birth;

OR

- Are protected against vector attacks by insecticides or repellents for at least 14 days preceding the date of movement;

AND

- Subjected during this period to a PCR with a negative result, carried out on blood samples taken at

least 14 days after the date of onset of protection against vector attacks.
